Blockchain technology could be the greatest innovation since the internet. What exactly is Blockchain? Blockchain is a simple but ingenious new protocol that allows peer-to-peer internet transactions that are both secure and anonymous. Many governments and companies are already looking at how to put blockchain technology in place in a wide range of areas. This new protocol could impact every individual on the planet within the next few years. Why is this important? Blockchain provides a new secure tool for the transfer "value" utilizing the internet. This is powerful, especially if you're a craftsman who wants to make a living from your art, or you're a businessman looking for a better platform on which to build future business. Knowing how this new technology works can give you a real competitive edge in the future. Many of the world's leading financial institutions are already testing this technology for faster, more secure transactions.
